*Livestock & Aquaculture  
Solutions for Food Security  
and Sustainable Growth*

# Who We Are

**Kordoba Agrotech Sdn. Bhd.** is a Malaysian agribusiness company focused on **closing the gap between high protein demand and limited domestic supply** through **small ruminant production** and **integrated aquaculture systems**.

We operate across the **entire agricultural value chain** — from genetics, breeding, hatchery, and farming to trading, distribution, and market supply — ensuring **reliability, quality, biosecurity, and scalability**.

**Kordoba  
Agrotech**

[kordobaagroturism.com](http://kordobaagroturism.com)

# Company Background

Our business model directly supports:

- National food security objectives
- Sustainable agricultural development
- Farmer income growth
- Import substitution and export readiness

## Vision

To become **a leading agribusiness group in Malaysia and the region**, recognized for excellence in small ruminant breeding, aquaculture innovation, ethical trading, and sustainable production systems.

## Mission

To deliver reliable, high-quality livestock and aquaculture solutions that strengthen food security, empower farmers, promote animal welfare, and contribute to sustainable economic growth.

# Our Products

**Small  
Ruminants &  
Fresh Meat**

**Aquaculture  
& Fisheries**

# Why These Two Sectors

[kordobaagroturism.com](http://kordobaagroturism.com)

Kordoba Agrotech deliberately focuses on small ruminants and aquaculture because:

**Protein demand is consistently high**

**Local production remains insufficient**

**These sectors are strategic to Malaysia's food security**

**They offer scalable, sustainable, and measurable impact**

# Small Ruminants – Sheep & Goats<sup>1</sup>

A high-consumption, under-supplied protein segment in Malaysia.

## 1. Scope:

- Advanced breeding and genetic improvement
- Live animal trading
- Fresh sheep and goat meat supply
- Farm advisory and capacity development

## 2. Key Breeds:

- Sheep: Santa Inês, Dorper
- Goats: Boer, Saanen, Jamnapari

## 3. Value Delivered:

- Higher reproduction efficiency
- Improved carcass and productivity traits
- Increased farmer profitability

# Aquaculture & Fisheries

A fully integrated “Hatchery-to-Market” aquaculture operation.

## 1. Scope:

- Fish hatchery (fingerlings / baby fish)
- Freshwater fish farming
- Fresh & frozen fish trading
- Import & export operations

## 2. Markets Served:

- Wholesalers
- Retailers
- Hospitality and food service industry
- Fresh markets

## 3. Value Delivered:

- Stable supply in a volatile protein market
- High survival rates through modern water systems
- Consistent quality and traceability

# Infrastructure & Capabilities

- Modern livestock breeding facilities
- Veterinary care and diagnostic support
- Genetic research and productivity optimization
- Aquaculture hatchery and farming systems
- Trading, logistics, and market access

All operations adhere to strict health, safety, and biosecurity standards.

# Track Record & Expertise

- Genetic improvement programs implemented across 200+ farms
- Proven productivity enhancement of up to 30%
- Operational experience in Egypt, UAE, Qatar, and Southeast Asia

# Our Company Values

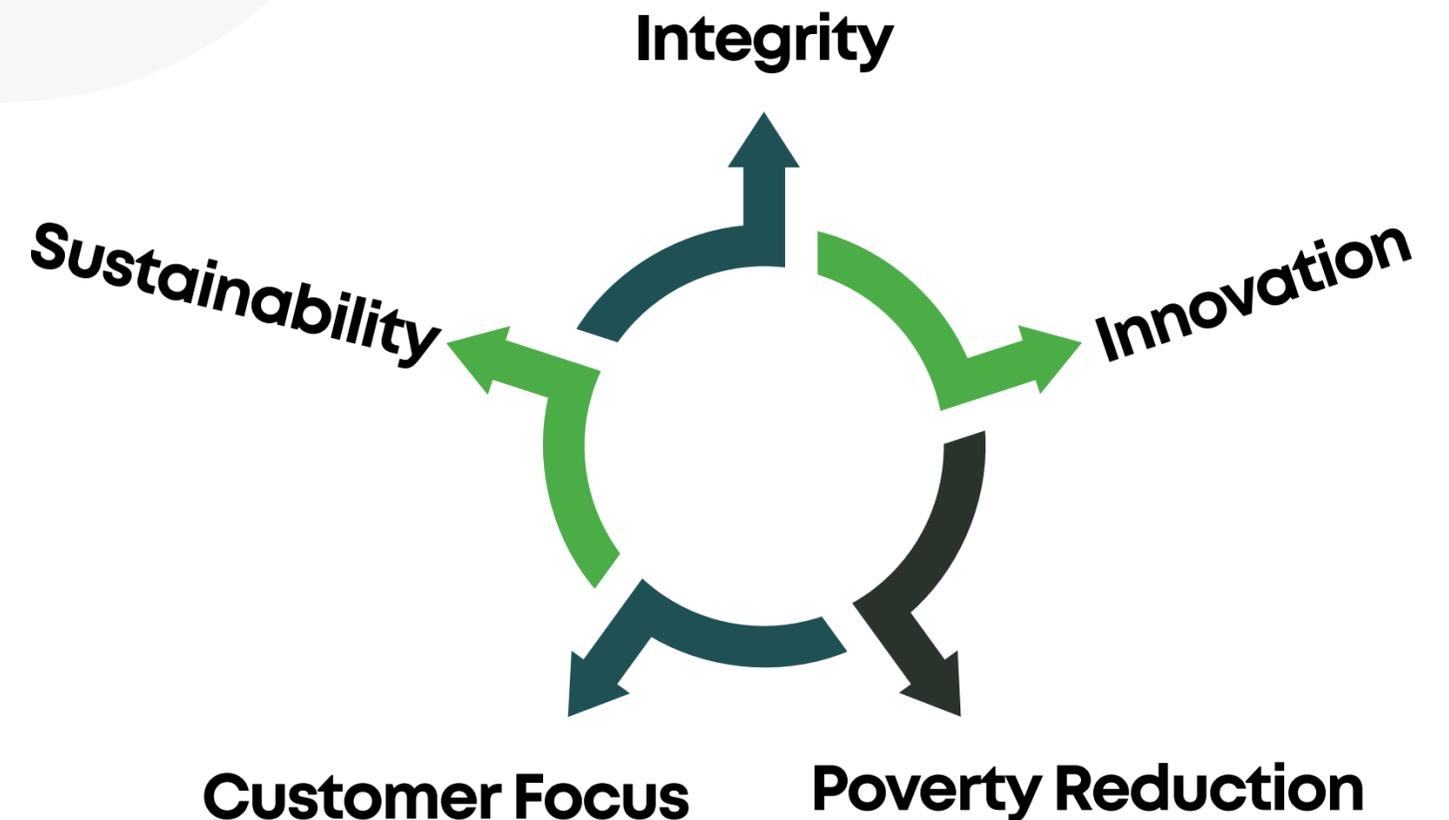

**Integrity:** Ethical, transparent, and accountable operations.

**Innovation:** Continuous adoption of modern breeding and aquaculture technologies.

**Sustainability:** Long-term environmental and economic responsibility.

**Customer Focus:** Practical, results-driven solutions.

**Poverty Reduction:** Improving farmer income through productivity and reproductive efficiency.

# Leadership

**Kordoba  
Agrotech**

## Founder

Mrs. Wan Hananiah Binti Wan Mohamed Hafai

## Chief Executive Officer

Dr. Ahmed M. Elrediny

A livestock and agribusiness professional with over 20 years of experience.

### Academic & Professional Background:

- Bachelor of Veterinary Medicine – Mansoura University, Egypt
- Diploma & Master's in Clinical Biochemistry – Egypt
- MBA (Project Management) – Malaysia
- PhD Candidate in Management – Malaysia

Dr. Elrediny combines scientific expertise, operational leadership, and strategic business management, ensuring execution credibility and long-term vision.
